

The Leibniz Institute for Solid State and Materials Research Dresden – in short IFW Dresden – is a nonuniversity research institute and a member of the Leibniz Association. The IFW employs approximately 600 people and one focus is on the training of young scientists besides enhancing fundamental and applied research development. At the highest international level, the IFW operates modern materials science on a scientific basis and makes the obtained results useful for the economy. The complex and interdisciplinary research work is carried out within the IFW by five scientific institutes, which are supported by a highly developed technical infrastructure. The IFW supports its employees in reconciling work and family life and regularly submits to the berufundfamilie® audit. Further information at: [www.ifw-dresden.de](http://www.ifw-dresden.de).

The Competence and Application Center for Acoustoelectronic Fundamentals, Technologies and Components – **SAW Lab Saxony** – of the Leibniz Institute for Solid State and Materials Research – IFW Dresden – is now offering positions for a student assistant.

Within the application-oriented project “ZePaRator”, our lab demonstrator for sample preparation will be further developed matching the requirements of applications in real world environments. As part of the team, you will plan, perform and analyze cell and particle separation experiments, also with complex (bio-)fluids like blood.

As a candidate (m/w/d), you study in the field of process engineering, biotechnology, microfluidics or similar and you are interested being part of a cutting-edge research team, and to work with a promising lab-on-a-chip technology. First experiences in working with human cells, analyzing devices (e.g. fluorescence microscope, flow cytometer) or microfluidics are advantageous. The ability to work in a team is strongly required.

Further information can be found at: [www.sawlab-saxony.de/contact-jobs/](http://www.sawlab-saxony.de/contact-jobs/) **SAW Lab SAXONY**

The institute promotes the professional equality between all genders. In science, the IFW Dresden would like to increase the proportion of woman. Qualified women are therefore explicitly invited to apply. Equally qualified handicapped applicants will be given preference.

If you are interested in the position, please send your application (in English or German) including a cover letter with CV and copies of certificates and other relevant material (if applicable) citing the **reference number ...** as a single pdf file (other formats will not be accepted) to the following email-address:

[bewerbung@ifw-dresden.de](mailto:bewerbung@ifw-dresden.de).

The position is open as long as the announcement is online.

Please contact Melanie Colditz ([m.colditz@ifw-dresden.de](mailto:m.colditz@ifw-dresden.de)) for more information. You can also ask for a master's or diploma thesis in this group.
